

ONIE Project Update

Nat Morris

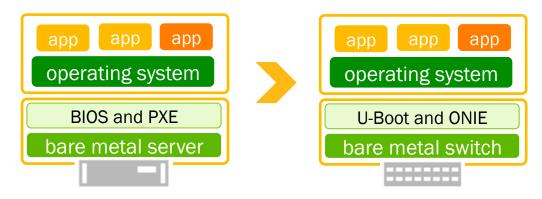

14th May 2013 @ RIPE68, Open Source Working Group

Summary – what is ONIE?

Similar approach to installing OS on server

- BIOS + PXE = U-Boot + ONIE (Open Network Install Environment)
- Supported hardware (HCL) preloaded with ONIE
- ONIE available on GitHub http://onie.github.io/onie/

Hardware Vendors

Agema

Operating System Vendors

UTSA OCP Certification Laboratory and ONIE

The UTSA OCP Lab will ...

- Collaborate on test plans
- Help develop test suites
- Help HW vendors certify their ONIE implementation
- Benefit OS vendors
- Improve the quality of the ONIE project

ONIE Ongoing development

Support Multiple CPU Architectures

- PowerPC ready today
- x86 ready today
- X86 Virtual machines
- Planning for ARM and MIPS
- Maintain ONIE behaviors across architectures

Choice

QuantaMesh BMS products offer higher performance, increased availability, low latency and better serviceability. QuantaMesh T1048-LB9 supports 48 10Base-T/100Base-TX/1000Base-T ports and 4 dual speed 1/10GbE SFP+ ports in a compact 1U size. By leveraging merchant silicon chips, T1048-LB9 is a high performance high density Ethernet switch with an affordable price for the deployment of data center infrastructure. With ONIE (Open Network Installation Environment) pre-loaded on QuantaMesh BMS switches, it provides the flexibility and allows choice of network operating system supported by ONIE installer. This provides agile installation process and faster response for the changing business demand.

Ouanta

OuantaMesh 1000 Series BMS T1048-LB9

A Powerful Top-of-Rack Switch for Cloud Datacenters

Overview

Datacenter networks are facing a major paradigm shift toward the disaggregation of software and hardware. This move. combined with the benefits of software-defined networking (SDN) allows network administrators respond quickly to changing business requirements at a lower capital cost as well as reducing the network operations complexity.

QuantaMesh BMS products offer higher performance increased availability, low latency and better serviceability. QuantaMesh T1048-LB9 supports 48 10Base-T/100Base-TX/1000Base-T ports and 4 dual speed 1/10GbE SFP+ ports in a compact 1U size. By leveraging merchant silicon chips, T1048-LB9 is a high performance high density Ethernet switch with an affordable price for the deployment of data center infrastructure. With ONIE (Open Network Installation Environment) pre-loaded on QuantaMesh BMS switches, it provides the flexibility and allows choice of network operation system supported by ONIF installer. This provides agile installation process and faster response for the changing business demand.
