Due Diligence for the Quality of the RIPE NCC Registration Data

Publication date: 23 Jul 2012

Introduction

The RIPE NCC has a mandate from the RIPE community to keep an up-to-date and correct Internet number resource registry. In order to comply with this mandate, the RIPE NCC performs due diligence on organisations the RIPE NCC registers Internet number resource for.

Due diligence refers to the controls the RIPE NCC performs:

- **Before** the registration of Internet number resources (see section 1)
- **After** the registration of Internet number resources (see section 2)

This document outlines the **minimum** information and documentation the RIPE NCC requires to make sure that the registration data is valid and up-to-date.

1. Before the registration of Internet number resources

The RIPE NCC registers Internet number resources to legal or natural persons that:

- Are contractually bound with either the RIPE NCC or a sponsoring LIR (see below section 1.1) and
- Meet the criteria defined by the [RIPE Policies](#) (see below section 1.2)

1.1. Establishment of an agreement

Legal or natural persons requesting the registration of Internet number resources

Readability Project

The RIPE NCC is currently undertaking a project to make a number of key policy documents easier to understand, without changing the meaning of the content.
